Introduction 1

Chapter 1 High expectations and the support they need 11
   The value of education 11
   Improving education: Why policy matters 13
   Hallmarks of effective infrastructure for a good public education system 15

Chapter 2 A semi-ordered freedom 19
   The 1980s: Interconnections and porous boundaries 19
   Teacher and school latitude before Tomorrow’s Schools 20
   The interconnecting inspectorate 22
   The source of inspectors’ authority 25
   Creative use of the “marvellous weapon” 27
   Challenges to sharpening school capacity 32
   Joint work to advance reading 34
   The advisers 39
   Limits on the sharing of new practice 41
   The reality of bureaucracy before Tomorrow’s Schools 43

Chapter 3 Strengths, weaknesses and tensions in the 1980s 48
   Impressions of the OECD examiners 49
   Primary learning 53
   Tomorrow may be too late 59
   Life and limits in secondary schools 61
   Fundamental challenges in secondary education 65
   Making sense of New Zealand student performance
      in an international context 67
   Challenging Māori statistics 69
   Interconnecting roads not taken 71
   The ‘community’ road 72
   The school takes centre stage 74

\v
Chapter 4 Shaking up and separating out

- Self-management as a solution
- The Picot taskforce
- Responses to the Picot report
- Tomorrow’s Schools
- Fleshing out the bones
- The cost of haste
- Fear of connections: The Lough report
- Long-term shadows

Chapter 5 A fragmented freedom: Schools in the 1990s

- Principals and their new role
- The demanding twins
- Competition between schools
- Development of the governance role
- Cautious reconnections across temporary bridges
- Safety-net intervention
- Holes in the safety nets
- Schooling improvement: Attempting some reconnection
- ERO: The watchdog and scold
- Tomorrow’s Schools: Still too late?
- Missing connections

Chapter 6 Piecemeal changes: Teaching and learning in the 1990s

- Seeds falling on shaky ground
- The new curriculum development
- Making sense of the new curriculum
- Mixed messages on the purpose of assessment
- Question marks over primary student performance
- The 1999 Literacy Taskforce
- Maths: The costs of an insufficient infrastructure
- Science stagnates
- An absence of useful focus: Schools and Māori learners
- Particular challenges for secondary schools
- Changes to secondary qualifications: Promises and pitfalls
- Costs of fragmentation
- Lessons from the 1990s
Chapter 7 Trying to ‘steer at a distance’ 162
Getting inside schools’ heads 163
Can ERO improve school self-management capability? 167
Whose responsibility? 169
Governance becomes more focused, but no simpler 171
Growing school leadership 174
Growing the knowledge needed for effective school leadership 175
Thwarted connections 178
The new local links: Grounds for hope? 181
Challenges for Ministry–school connections 183
Pressure on system funding from school self-management 186

Chapter 8 New frameworks for teaching in primary schools 189
Support for change 189
Shifting numeracy teaching 190
A way to go 192
Shifts in writing 195
Schools inquiring 197
Strengthening school professional inquiry cultures 198
Constraints on achieving shifts for all schools 199
National Standards: Trajectory interrupted or a new pathway? 201
The low-decile challenge 207

Chapter 9 A new framework for secondary achievement: Gains and challenges 214
Are schools places where students want to be? 215
PISA and the questions it raises for us 218
Reframing qualifications: Secondary outcomes and NCEA 226
Challenges beyond the low-hanging fruit 230

Chapter 10 What self-managing schools need to succeed 236
1. The cost of equating school self-management with stand-alone schools 237
2. Costs of fragmentation 247
3. Hidden costs 249
Making the most of self-managing schools 251
